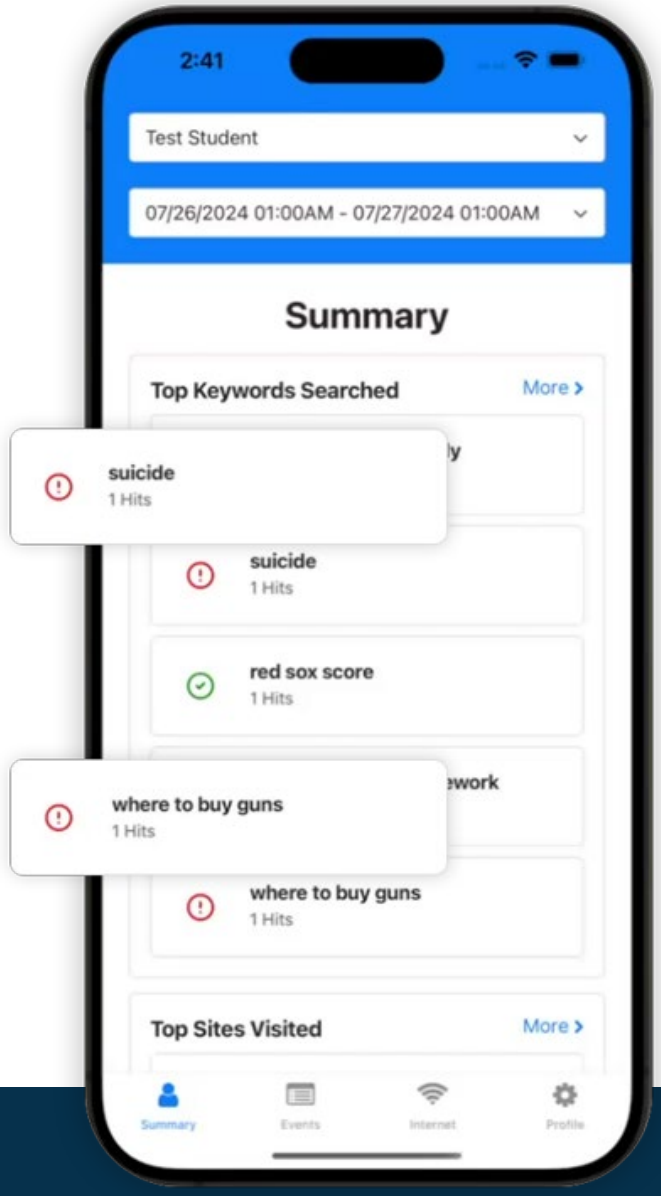
Parent Portal

Enhancing Digital Safety and Well-being with the Visibility and Control That Empowers Parents

The iboss Parent Portal is a solution designed to provide parents with real-time insights and control over their children's online activity. Available as an app for both iOS and Android devices and seamlessly integrated with iboss' Zero Trust SASE platform, the Parent Portal empowers parents to monitor their child's internet usage, ensuring a safe and productive online environment both at home and in school.

By extending visibility to parents, the iboss Parent Portal helps schools strike the right balance between privacy and security, while giving parents the tools to manage access and monitor activity. IT staff benefit from streamlined administration, as the iboss Zero Trust SASE platform allows them to centrally maintain control over network and security policies while the Parent Portal enables parents to take an active role in their child's online safety.



Key Capabilities

Activity Overview for Parents

Provide parents with a clear snapshot of their child's online activities, highlighting key sites and potential risks.

Detailed Browsing Records

Equip parents with a comprehensive log of their child's internet usage, with easy filtering for specific insights.

Internet Access Control

Enable parents to set and manage internet access schedules, supporting balanced and secure online time for students.

Managing Student Activity Safely and at Scale

Challenge

As the use of technology grows in K-12 environments, managing online student activity becomes increasingly complex. Schools need to offer parents visibility into their children's online behavior without compromising the security and compliance standards enforced by IT teams. However, many solutions are either too limited or introduce unnecessary complexity.

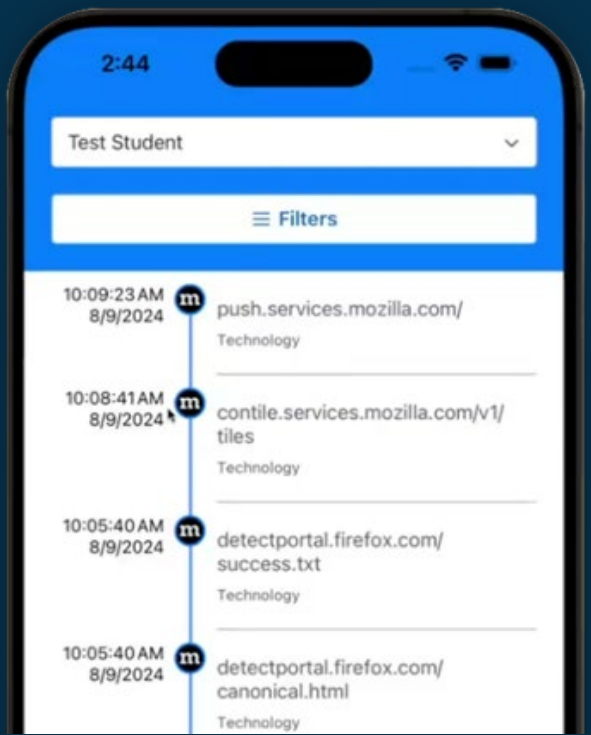
Solution

The iboss Parent Portal, part of the iboss Zero Trust SASE platform, extends monitoring and control to parents without adding complexity. IT staff manage security centrally, while parents gain real-time access to their child's activity.

Benefit

The Parent Portal integrates seamlessly with the iboss Zero Trust platform, ensuring a unified approach to managing online safety. IT teams maintain security standards while parents access real-time insights into their child's online activities.

Real-Time Activity Monitoring within a Single SASE Solution



Challenge

Parents require greater visibility into their children's online activities, including specific websites visited, but they often lack the tools to access and filter this information effectively.

Solution

The iboss Parent Portal provides summarized and detailed website history views, letting parents see exactly what sites were visited. Parents can also search by date, websites, or blocked attempts, making data review simple and quick.

Benefit

Parents get a clear activity summary highlighting key sites and risks alongside a detailed website history, allowing easy filtering of relevant data. This ensures parents can guide internet use safely and effectively.

Features

Roster Sync Integration
Seamlessly syncs with popular roster tools like Classlink and Clever, ensuring student data is always up-to-date for accurate monitoring and access control.

Real-Time Activity Monitoring
Parents can view their child's online activity as it happens, providing instant visibility.

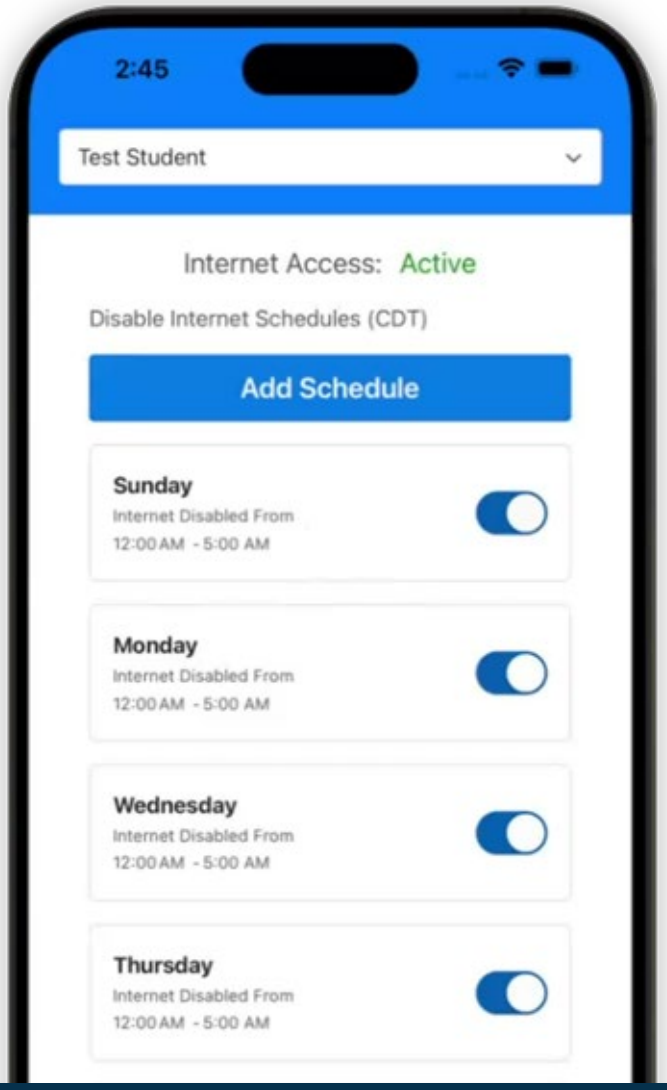
Detailed Website History
Access to a full history of visited sites, with filtering options for quick and easy data review.

Internet Access Scheduling
Parents can control internet access times, aligning online activity with family and school schedules.

Activity Summary View
Provides a snapshot of key websites and potential risks, helping parents monitor critical online behaviors.

Flexible Filtering Options
Allows parents to filter activity by date, specific sites, or blocked attempts for a customized view.

Multi-Language Support
Parent Portal supports multiple languages, ensuring accessibility for diverse communities.



Security and Compliance Powered by iboss Zero Trust SASE

The iboss Parent Portal, as part of the iboss Zero Trust SASE platform, empowers schools to deliver robust parental controls without compromising on compliance, student privacy, or network security.

The iboss Zero Trust SASE platform delivers comprehensive security and compliance from a single, centralized console. With built-in encryption, seamless policy enforcement, and full alignment with regulations such as CIPA, the platform simplifies management while protecting sensitive data across all devices and locations.
